**Date:** 01 September 2015

Dear Mr Carter

### **Ashton Keynes Neighbourhood Plan – Sustainability Appraisal Scoping Report**

Thank you for consulting the Environment Agency on the above scoping document.

We support the environmental objectives EN1 to EN4.

In section 4.2.c (Baseline Information – water resources and flood risk) the Environment Agency's Flood Zones are discussed. For completeness we would recommend also including the [Flood Map for Surface Water](#). This data can be supplied by the Environment Agency but surface water flooding is within the remit of Wiltshire Council as the Lead Local Flood Authority. This mapping was principally produced for use in Emergency Planning but gives an indication of areas likely to be affected by surface water flooding up to the 1 in 1000 year storm. Please visit our website [here](#) to access the Flood Map for Surface Water.

Yours sincerely

*E Challans*
