**Subject:** Housing development

Hello

The neighbour plan is good and I support the objectives it states. I appreciate that we and the country need more new housing at affordable cost but our way of doing this is by using brownfield sites is correct. By using greenfield it will be detrimental to the village. I am particularly concerned with impact on the environment, the school and the amount of increased traffic. And if we loose one green site would there be more to follow?

Regards  
Carol Jones

PS I have sent a mail to Mike Smith on Lake 82 and filled in form on feedback for the draft Neighbourhood Plan=
