Subject: Pre-Submission Consultation Comment

My wife and I have viewed the plans for the future development of Ashton Keynes and we are very satisfied that they represent a sensible way forward particularly with the commitment to only using brown field sites. The new proposal to develop the field behind the school cuts right across this principle and I wish to register our objections on the grounds that it would be a great loss of amenity for the village and a degradation of the environment. If there is any future requirement to enlarge the school, this would no longer be possible and I hope that the committee will be able to block this very unwelcome scheme
